

# GRAVITY.

BY JONATHAN CAMILLERI

# WHAT IS GRAVITY?

WHY DO YOU STAND UP AND NOT FLY AWAY?  
THAT IS BECAUSE OF GRAVITY.  
IT MAKES EVERYTHING FALL ON THE GROUND.  
IT IS NEEDED TO KEEP THE WORLD TURNING ON IT'S  
AXIS.

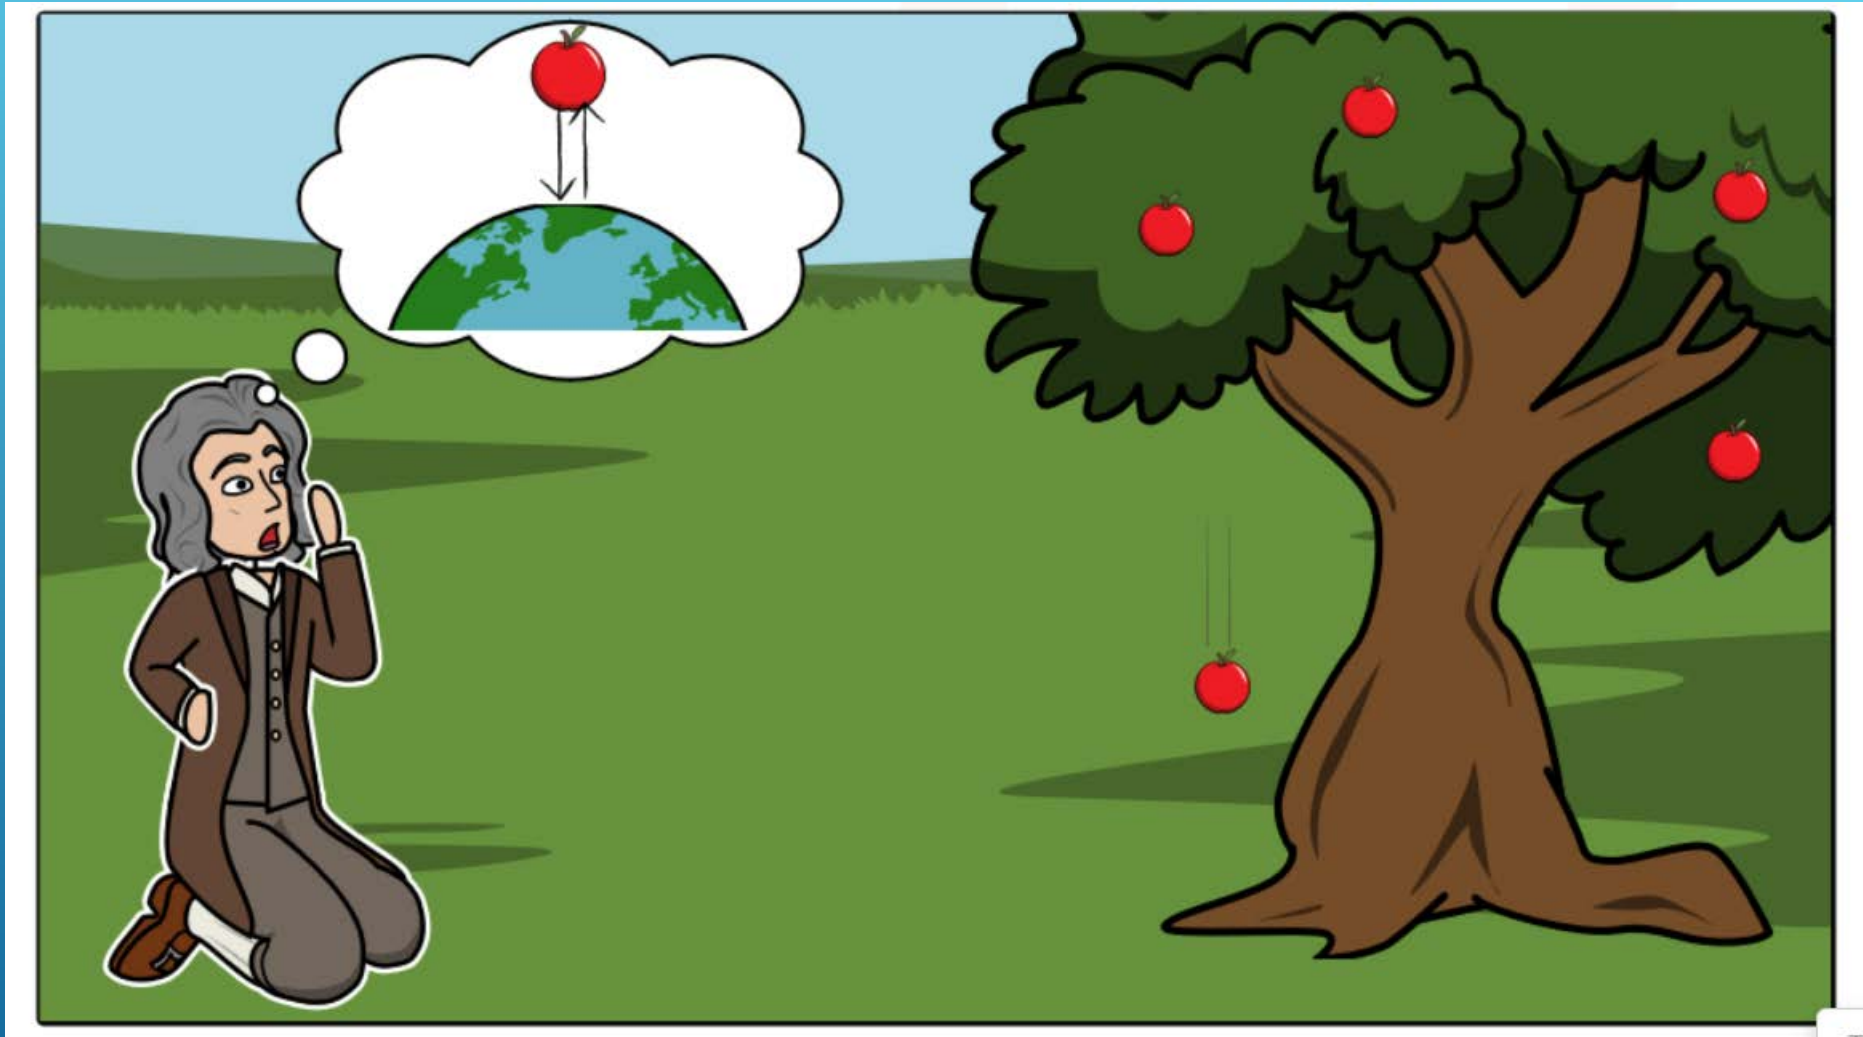

## WHEN WAS GRAVITY DISCOVERED?

IN 1687 ISAAC NEWTON WAS SITTING UNDER AN APPLE TREE AND AN APPLE FELL ON HIS HEAD.

HE THEN STARTED WORKING FOR HOURS AND EVEN DAYS RESEARCHING AND FINALLY, HE DISCOVERED A NEW FORCE.

HE CALLED IT, THE FORCE OF GRAVITY.

## TIDES AND MOON

GRAVITY ALSO CONTROLS TIDES, AND  
KEEPS THE MOON ORBITING EARTH.

THANK YOU  
I HOPE YOU  
LIKED IT
